TIRES TREAD NEW PATHS

RALSON
50
— YEARS OF —
TREADING NEW PATHS

TREAD NEW PATHS

EVERY CHAMPION BEGINS WITH A NEW PATH.

Celebrating 50 years of treading new paths, Ralson Tires has always stood for courage, innovation, and the spirit of adventure. We believe the real thrill begins where comfort ends pushing boundaries, exploring the unknown, and creating journeys worth remembering.

Our high-performance tires are built not just for strength and stability, but to open doors to new experiences. With Ralson Tires, every road becomes a chance to explore the unexpected safely, securely, and with the confidence to keep moving forward.

NO MATTER THE CHALLENGE, YOU CAN ALWAYS RELY ON US.

As a global tire manufacturer, Ralson Tires is committed to providing world-class commercial tires for truckers and fleet owners around the world, while reducing the overall operating cost.

We have handpicked the best machines and technologies in the commercial tire manufacturing category from across the globe. Our team of highly experienced rubber-technologists and specialist engineers combine their several decades of experience to bring to you a range of commercial tires that are a perfect match for your every need.

Ralson Tires are engineered and designed for the smoothest experience under any weather; providing longevity, endurance, optimum safety, and mileage to reduce the operating cost of the vehicle.

EXPECT MORE, BECAUSE WE STRIVE TO EXCEED YOUR EXPECTATIONS

With precision engineering equipment from leading global suppliers based out of the Netherlands, USA, Germany, Italy, Japan, France and many more countries, we ensure you receive the utmost quality tires. A talented and dedicated team of R&D engineers and renowned rubber technologists armed with ultra-sophisticated computer programs develop our tread patterns and casing designs.

Perfectly suited to your needs to run efficiently on international roads and highways, you can be rest assured that our tires are of world-class quality.

Our massive facility consistently rolls out high quality commercial tires at an astonishing rate, producing one million tires per year. Our best-in-class equipment ensures the accuracy of the extrusion process while the RFID-enabled bead preparation gives our tires superior quality construction and high durability.

After rigorously testing prototypes in simulations, a final round of 20 inspection tests is conducted to ensure that only the highest quality tires reach you. Through x-ray inspections, stringent endurance and uniformity tests, we ensure that fleets and owner operators can rely on Ralson tires for long tread wear, dependable traction, and durability.

TECHNOLOGY TOWARDS A BETTER TOMORROW. FOR YOU AND OUR WORLD.

Nitrogen Curing vs Hot Water Curing

To help bring you longer tire life, better ride comfort, longer casing durability, and higher fuel economy, we use a special Nitrogen Curing system that allows for better control over the curing process, consequently leading to better tire-uniformity.

CCT

Our proprietary Cool Compound Technology (CCT) helps to bring you low-rolling resistance that enables higher fuel economy, saving you liters of fuel and reducing your overall cost of operation, without compromising performance or durability.

EVERY STEP COUNTS TOWARDS A GREENER FUTURE

As a commitment to the environment, we have developed tires with low-rolling resistance, which increases fuel economy and consequently reduces the tires carbon footprint.

Thousands of tree saplings were planted in and around the premises of our plant, fostering new green life in the area. Additionally, rainwater is constantly harvested, making the most out of the Indian monsoon and thereby reducing the overall water consumption.

Our efforts towards sustainability

We are in constant effort to develop processes and products that contribute to a cleaner future.

Retreadability

Choose sustainability with our retread warranty and extract the maximum our tires have to offer.

Our advanced eco-friendly retreading solution gives your tires new mileage with up to two retreads till a period of 6 years from the date of purchase. This, not only saves you money, but helps save the environment too. By reusing and recycling the tire casing, you save energy, resources, and even help reduce the number of tire carcasses in landfills.

RMR51

FEATURES & BENEFITS

- 1 Integrated Functional and Optical Sipes: Better traction, cooler running, and even wear.
- 2 Wider Shoulder Rib: Resists tearing and improves tread and casing life.
- 3 Sinusoidal Shoulder Groove: Higher traction and stable shoulders for uniform wear.
- 4 Optimized Groove Angle with Stone Ejector: Self-cleaning and reduced downtime for longer casing life.
- 5 Balanced Rib Ratio: Even pressure, better handling, and higher mileage.

RMR61

FEATURES & BENEFITS

- 1 Integrated Functional and Optical Sipes: Even wear. Extended tread life. Emerging wear appearance.
- 2 Wider Shoulder Rib: Improved tread and casing life.
- 3 Stress Relief Sipe: Smoother ride. Enhanced braking power.
- 4 Stone Ejectors: Improved tread and casing life.
- 5 Balanced Rib Ratio: Higher mileage. Even wear. Better driving control. Driving comfort.

RTR51

FEATURES & BENEFITS

- 1 Full-depth Multi-dimensional Sipes: Reduces irregular wear for higher mileage.
- 2 Optical Sipes: Improve initial traction for even wear.
- 3 Corrugated Cooling Fins: Boost cooling for longer casing life.
- 4 Chamfered Solid Shoulder: Resist sideways forces for even shoulder wear.
- 5 Balanced Rib Ratio: Even pressure for higher mileage and uniform wear.
- 6 Wear Equalizer: Reduce irregular wear for higher mileage.

RTR61

FEATURES & BENEFITS

- 1 Full-depth Multi-dimensional Sipes: Provides higher mileage and even wear.
- 2 Corrugated Cooling Fins: Even wear. Extended tread life. Emerging wear appearance.
- 3 Integrated Functional and Optical Sipes: For long casing life.
- 4 Balanced Rib Ratio: Provides higher mileage and even wear.

RDR52

FEATURES & BENEFITS

- 1 Integrated Blocks: High traction, rigid blocks, and uniform tread wear.
- 2 Optical Sipes: Better traction, heat control, and longer tread life.
- 3 Kissing and Parting Sipes: Stiffer blocks, stable footprint, and long, even wear.
- 4 Closed Shoulder: Controls weight and torque for even wear.
- 5 Balanced Ribs: Even pressure, higher mileage, and improved handling.
- 6 Groove Angle: Self-cleaning and longer tread/casing life.

RDR55

FEATURES & BENEFITS

- 1 Integrated Blocks with Tie Bar: High traction and low rolling resistance for uniform wear.
- 2 Optical Sipes: Better traction and heat control for longer tread life.
- 3 Kissing and Parting Sipes: Stiffer blocks for stable braking and longer, even wear.
- 4 Balanced Rib Ratio: Even pressure for better handling, mileage, and comfort.
- 5 Optimized Groove Angle: Self-cleans to reduce downtime and extend casing life.

RDR75

FEATURES & BENEFITS

- 1 Integrated Blocks: With tie bar for uniform wear throughout tire tread life.
- 2 Intricate Sipe Design: For even wear & long tread life.
- 3 Wider Open Shoulder: Improves tread and casing life.
- 4 Balanced Rib Ratio: Provides higher mileage and even wear.
- 5 Deeper Elliptical Sipes: Provides uncompromised grip throughout tire tread life.

RDR95

FEATURES & BENEFITS

- 1 Integrated Blocks: With tie bar for uniform wear throughout tire tread life.
- 2 Intricate Sipe Design: For even wear & long tread life.
- 3 Wider Open Shoulder: Improves tread and casing life.
- 4 Balanced Rib Ratio: Provides higher mileage and even wear.
- 5 Deeper Elliptical Sipes: Provides uncompromised grip throughout tire tread life.

TRACTION THAT ENDURES.

RDC56

RDC66

RAC52

FEATURES & BENEFITS

- 1** Sinusoidal Shape Diverter: Provided along the circumferential direction of shoulder groove.
- 2** Wavy Groove Shape: Enhances the tire's adaptability to different road surfaces and conditions.
- 3** Dense Intricate Sipe Design: Improves grip on various surfaces, especially in wet conditions.
- 4** Chip / Cut Compound: Enhances tire life and improves casing integrity.
- 5** Balanced Rib Ratio: Provides stability, longer mileage.

RAC55

FEATURES & BENEFITS

- 1** Integrated Blocks/Notches: High traction, low rolling resistance; uniform tread wear.
- 2** Optical Sipes: Better traction, heat dissipation improved grip, even wear.
- 3** Open Shoulder Pattern: Strong traction, self-cleaning longer tread/casing life.
- 4** Optimized Grooves/Ejectors: Self-cleaning, less downtime better tread/casing life.
- 5** Balanced Ribs: Even pressure, higher mileage, uniform wear.

RAC82

FEATURES & BENEFITS

- 1 High traction & low rolling resistance: For uniform wear and longer tread life.
- 2 Heat Dissipation & Stable Shoulders: For Even wear under weight & torque.
- 3 Balanced Rib & Groove Design: Higher mileage, self-cleaning, stone ejection.
- 4 Edge Grip Stability: Reduced slip, better road contact, improved casing life.

RDC56

FEATURES & BENEFITS

- 1 Bigger Tread Blocks: Higher load capacity longer tread life.
- 2 Extra-deep Tread: Extended service life; higher mileage.
- 3 Open Shoulder Pattern: Strong traction, self-cleaning, better tread/casing life.
- 4 Solid Center Rib: Improved damage resistance higher mileage.
- 5 Narrow Center Groove: Better heat dissipation longer tread life.

RDC66

FEATURES & BENEFITS

- 1** Stronger Grip: Large tread blocks and a wider footprint ensure excellent traction and load handling.
- 2** Built to Last: Extra-deep tread design delivers extended service life and higher mileage.
- 3** All-Terrain Ready Open Shoulder Blocks: Offer superior traction and self-cleaning for rough conditions.
- 4** Smooth & Stable: A larger contact patch enhances flotation and ride comfort.
- 5** Damage Defender: Solid center rib improves resistance to cuts and mechanical wear, boosting longevity.

A PROMISE THAT LASTS A LIFETIME.

The warranty period for commercial tires manufactured by Ralson is 5 years from the date of sale.

WHAT IS COVERED UNDER WARRANTY

The warranty covers only defects and damage that can be attributed to the manufacturer. Other damage caused by improper use or mechanical damage will not be considered under warranty. Prorated Tire Replacement (Limited Warranty with respect to Defects in Material, Workmanship or Design)

If a Ralson commercial tire becomes unserviceable due to a defect in design, workmanship or material after more than 12 months have elapsed from date of purchase, you will be entitled to a prorated percentage allowance applicable to the purchase price of an equivalent new Ralson commercial tire or other equivalent tire brand marketed by Ralson.

ELIGIBILITY CRITERIA

- * You are the owner of new Ralson commercial tires.
- * Your Ralson commercial tires have been used only on the vehicle on which they were originally installed as suggested by vehicle manufacturers and recommendations by Ralson.
- * Fit tires of the exact size, load capacity and maximum speed specified on the vehicle in the technical requirements for a given vehicle.
- * Operate the tire at the tire pressure recommended by the vehicle manufacturer.
- * Use rim sizes corresponding to the size of the product.

WHAT IS NOT COVERED UNDER WARRANTY

Irregular Wear or Damage due to:

- * Road hazards, punctures, cuts, snags, impact breaks, etc.
- * Mechanical conditions of the vehicle.
- * Tires with weather cracking which were manufactured five (5) or more years prior to presentation are not covered.
- * Accident or vandalism.
- * Wreck, collision of tire.
- * Improper inflation, overloading, high speed spin up, misapplication, misuse, negligence, racing, chain damage or improper mounting or de-mounting.
- * Any tire intentionally altered to change its appearance.
- * Tire branded or marked "non-adjustable" (NA) or blemished (Blém) or previously adjusted.
- * Misapplication of tire, use of improper inner tube.
- * Alteration of the tire or addition of alien material.
- * Transfer from one vehicle to another.
- * Loss occurred over time or use, incidental or consequential damages.
- * Ride disturbance due to damaged wheels or any other vehicle condition.
- * Material added to a tire after leaving a factory producing Ralson tires like tire fillers, sealants or balancing substances. If the added materials are the cause of the tire becoming unusable, the tire will not be adjusted.
- * Cost of mounting and balancing service except what is covered under warranty.
- * Commercial tire failed due to faulty retreading or material.
